5 Palm oil (アブラヤシの実からとれる油) についての英文を読んで、後の設問に答えなさい。

Have you ever heard of palm oil? It is used for cooking in *tropical countries. This cooking oil can be produced at a lower cost than other oils. Also, there are many other things which are made from it. In developed countries, it is popular for *cosmetics, *detergents, and food products like ice cream and so on. *Moreover, palm oil is used as *fuel. ①Palm oil has so many uses, and because of this, we can't live without it today.

This *industry gives many people work opportunities at palm oil plantations. These plantations are seen in many parts of Asia, Africa, and Latin America. In these countries, government leaders support the industry (②) they bring *income for the government and its people.

Do you think ③it is good to produce these products and use them so much? These products are made from plants, but are they environmentally friendly?

Palm oil is produced in tropical forests. People in these areas are cutting down trees and making palm oil plantations to make more money. When you look at those areas, you will notice that many kinds of animals live there. In Africa, there is a group of animals ④call the Big 5. They are buffaloes, elephants, *leopards, lions, and *rhinoceroses. Many of these animals' homes are made into palm oil plantations. That means that these (⑤) animals have to live in a (⑥) place.

Also, Southeast Asia is known for its jungles. There are a lot of developing countries in this area. ⑦They (choosing / the governments of them / so / are / that / money / poor / are) instead of nature. The Amazon Rainforest in South America has more than half of the world's rainforests. Palm oil companies are decreasing parts of the rainforests, so it may not be the largest in the future.

When large companies buy these lands, they think of only *profit. The government also supports them because they bring wealth. In this way, tropical forests are decreasing and more animals are losing their homes. However, the palm tree itself is not harmful, and palm oil is important for our daily lives.

Now, we need to think about how companies should produce the oil. If there is better *management, the palm oil industry can make a profit without destroying some of rainforests. To protect ⑧nature, oil plantations need strict rules to apply to all stages of palm oil production. On the other hand, we need to protect our natural treasures. So, what should we do in our daily lives? One thing we can do is to buy products with RSPO mark. RSPO, *Roundtable on Sustainable Palm Oil, is a large international group of palm oil producers, palm oil buyers, and environmental and social groups. They discuss what we can do at this meeting. In Japan, many companies support the idea of RSPO. When you go shopping, please look for this (⑨). Your action will change the palm oil industry in the future!
